

hardscape design elements

description

christopher has extensive experience in the design of hardscape elements as part of the overall landscape of a site. The hardscape elements are designed to complement the landscape elements to create an overall planting design that helps establish a positive aesthetic experience for the users within the space.

Our services include concept design though to production of final construction drawings.

project types

- Paved areas like sidewalks, plaza areas or courtyards
- Decorative Walls/Retaining Walls
- Street Amenities/Decorative Site Features
- Water features/pools and fountains
- Fireplaces/fire pits
